PROFESSIONAL SUMMARY

Computer Science student and aspiring Backend Developer with hands-on experience building RESTful APIs in C# and ASP.NET Core, backed by a backend internship at Raya. Comfortable working across the full server-side stack: Entity Framework Core, LINQ, SQL Server, MVC architecture, and Git-based collaboration. Looking for a junior backend role where I can ship production code, learn from senior engineers, and grow into a strong .NET developer.

EXPERIENCE

Backend Developer Intern

September 2025 – November 2025

Raya – Cairo, Egypt

- Developed and consumed RESTful APIs using ASP.NET Core, implementing full CRUD operations with a SQL Server database.
- Designed and queried relational database schemas including Products and Sellers tables to support backend data needs.
- Built and tested API endpoints (GET, POST, PUT, DELETE) and integrated them with a client-side application.

Full-Stack .NET Developer Trainee

October 2024 – May 2025

Digital Egypt Pioneers Initiative (DEPI) – Cairo, Egypt

[Certificate](#)

- Built and deployed RESTful APIs with ASP.NET Core and Entity Framework Core.
- Developed dynamic web applications using MVC architecture (controllers, views, middleware).
- Completed workshops in soft skills, freelancing, client communication, and teamwork.

EDUCATION

Bachelor of Computer Science

September 2023 – Present

Faculty of Computer Science, Misr University for Science and Technology (MUST) – Cairo, Egypt

Expected Graduation: July 2027 | GPA: 3.3 / 4.0

PROJECTS

EDU-HUB – Online Learning Platform

- Full-stack eLearning platform built with .NET Core, C#, JavaScript, HTML, and CSS.
- Implemented student enrollment in courses, and professor-side course and quiz creation and management.

Price List Products – REST API and Database

github.com/salmaamr129/price-list-api

- Built a RESTful Web API (GET, POST, PUT, DELETE) over a SQL Server schema with Product and Seller tables, hosted on IIS.
- Developed a client application that consumes the API to retrieve, add, edit, and delete product records.

Library Management System

github.com/salmaamr129/LibraryManagementSystem

- Desktop application in C# (Windows Forms) backed by SQL Server, supporting full CRUD on books and members.
- Implemented login / registration, a dashboard, and borrow / return workflows to track library transactions.

DIBCO Document Enhancement

github.com/salmaamr129/dibco-document-enhancement

- Document image enhancement project using the DIBCO dataset.
- Applied preprocessing and binarization techniques in Python (Jupyter Notebook) to restore degraded handwritten and printed documents for better readability and analysis.

Women's Wear – E-Commerce Frontend

- Built a responsive fashion e-commerce frontend in HTML, CSS, and JavaScript, with focus on cross-browser compatibility.

TECHNICAL SKILLS

- **Languages:** C#, VB.NET, SQL, JavaScript, HTML5, CSS3
- **Frameworks and Libraries:** ASP.NET Core, ASP.NET MVC, Web API, Entity Framework Core, LINQ
- **Databases:** SQL Server, MySQL, relational database design, query optimization, stored procedures
- **Backend Concepts:** RESTful APIs, CRUD, MVC, Object-Oriented Programming (OOP), authentication, dependency injection
- **Tools and Platforms:** Visual Studio, Git, GitHub, IIS, Postman
- **Currently Learning:** Python, Pandas, data analysis and visualization

CERTIFICATIONS

- Full-Stack .NET Development Program – Digital Egypt Pioneers Initiative (DEPI), 2025
- Problem Solving Certificate – ICPC MUST Community
- Web Development Certificate – IEEE MUST Community

ORGANIZATIONS

- Member, IEEE Web Development Community – MUST University
- Member, Marketing Community, Enactus MUST University
- Member, Sona' El Haya Volunteering Group

LANGUAGES

- Arabic – Native
- English – Professional working proficiency
